

Dear #name# #surname#

December 2016, Volume 15, Issue 12

AMS Christmas Break Closure

AMS will close for the Christmas break at 2.00 pm on Friday 23rd of December and re-open on Monday January 9th at 9.00 am.
For calibration bookings prior to the shutdown the deadline is Friday the 17th of December.

**A MERRY CHRISTMAS AND A HAPPY
NEW YEAR**
from all at
**AMS Instrumentation & Calibration
Pty Ltd**

AMS Casual Friday / Christmas Donations

AMS / Trimec Flow Products have over the years proudly donated monies to a variety of worthwhile organisations. Following a consensus of staff it was decided that in future only one organisation will be the beneficiary of our fundraising efforts. The organisation chosen was the [Cancer Council Australia](#). Cancer comes in many forms and affects many people in different ways, either personally or through connections.

AMS hopes in a small way to support the efforts of Cancer Council Australia to find cures for a variety of cancers in the future with a donation of \$2,500.00 for the year 2016.

Find out more about at their website [Cancer Council Australia](#)

To realise our vision, Cancer Council Australia and its members undertake a broad range of activities. Some of these are:

Research

Cancer Councils are the leading independent funders of cancer research in Australia. In 2016, research grants through Cancer Councils totalled more than \$65.5 million. Cancer Councils directly funded \$43.4 million, with a further \$22.1 million contributed by our research funding partners.

Information

We provide evidence-based, up-to-date information about all aspects of cancer to: doctors and other health professionals - to help improve prevention, detection and treatment of cancer cancer patients and the general community - more than 50,000 Australians contact the Cancer Councils for information and advice each year, through Cancer Council 13 11 20.

Prevention

Our early detection and prevention programs aim to help people quit smoking, protect themselves from the sun, eat healthier foods and engage in physical activity to reduce the risk of cancer. Patient support Cancer Councils coordinate a network of cancer support groups, services and programs to help improve the quality of life of cancer patients, people living with cancer, their families and carers.

AMS News

2016 proved to once again to be an exciting year for AMS with all states and territories performing very well. Several of our product lines had an outstanding year exceeding our expectations and double the expected sales. A special thanks must go out to the New South Wales team on getting a major order for Beamex from pharmaceutical companies. This years performance gives us great hope for an exciting 2017.

Sales Meeting

The sales meeting just before the Christmas break proved to be invaluable with participation from all to discuss not only sales strategies, but more technical discussions and get more insight in the customers processes. All agreed that it was a great meeting and in particular the Christmas party afterwards which was held in the Yarra Valley with most the wives/partners present.

New South Wales Office

As mentioned in AMS News the New South Wales office performed exceptionally well in 2016 and we look forward to another great year with some of the thoughts they have in mind to involve their customers. As can be seen from the picture Michael Elliott and Fahim Arif holding up their 2016 Achievement award with pride.
