

The AMS logo consists of the letters 'AMS' in a white, bold, sans-serif font, centered within a solid teal square.

Oil and Gas Industry

AMS Instrumentation & Calibration is your number one source for process instrumentation solutions for the oil and gas industry. We understand the need for high quality, high performance control and monitoring equipment in your industry, and can help you select the right device for your application.

[Request a quote](#)

Calibration Equipment and Software

We offer a full range of [pumps](#), [calibrators](#) for pressure, temperature and electrical signals and [calibration software](#).

Flow, Level and Pressure Sensors

We offer a full line of flow meters ([liquids](#) and [gases](#)) to keep track of output and input volumes, [level transmitters and switches](#) for tanks and other vessels, [pressure gauges](#) and [pressure transmitters and switches](#) or safety monitoring, and much more.

Analytical Instrumentation

We offer a full range of analytical instrumentation for [liquid analysis](#), [gas analysis](#), [moisture](#), [relative humidity](#), [moisture and boiler analysis](#)

Start-up, Calibration & Service

AMS Instrumentation & Calibration are able to provide setup and programming for new equipment, as needed, as well as [service and onsite calibration](#) of devices in the field. Our expert technicians will help you get the best possible performance from your process instrumentation.
